BLACKSBURG, VA., September 18,-(Special.)-The institute opens on Tuesday next, and the indications are for a large attendance. Already more than 115 appointments have been received by President McBryde. It seems practically certain that 220-odd old students will return, thus giving 335 students in sight now, and many appointment blanks are still out. Everything has been put in shipshape for their reception. Students have been arriving every day for the past week, and there are already between

President McBryde, Miss McBryde, and Miss Maria Bolton have returned from their northern trip, which was in all respects most delightful. While away the President visited the Massachusetts Institute of Technology and Harvard Uni-

Not only are partridges very plentiful, but hunters say they have never seen such numbers of rabbits, squirrels, and wild-turkeys as are to be found this fall in our fields, forests, and mountains. The chestnut crop is also very heavy. Indeed, this has been a year of abundance, and with the good prices now ruling the farmer looks as smiling as

ting in the new system of water-works has been exemplified in a marked degree. The continuous drought has seriously affected our streams, and many spring have gone entirely dry. Some of our farmers are hauling water for household purposes and driving their stock to neighboring streams. Were the institute dependent on its old water supply, serious trouble would be experienced just at the opening of the session. As it is, the spring recently purchased all needs most generously, and there is hand of the boy orator, and patting can no visible diminution in the supply.

In reply to a question by an Index-Appeal reporter yesterday, Hon. W. P. McRae, one of our present representatives in the Virginia House of Dele tives in the Virginia House of Delegates, said that he would not be a candidate for re-election. He further stated that it was a matter of serious consideration with him at the election in 1895, whether or not he should then be a candidate. It was with some surplus that the reporter heard this arrives that the reporter heard this arrives. prise that the reporter heard this an-nouncement, because the impression is revalent that Mr. McRae would be a

Mr. McRae is now serving his second erm in the House of Delegates, having been elected in 1833 and in 1896, and was one of the youngest members of the Legislature when he entered that being about 30 years of age. He proved an earnest and indefatigable worker, and was influential in some of the most important legislation of the the law requiring separate juries in cou-pon cases, thus saving to Petersburg an annual expense of \$1,509 or \$2,000; had an act passed allowing husband and wife to testify for and against each other in certain cases, and besides being patron of many other useful mea-sures, caused the passage of the acts allowing any officer or fiduciary to give changing the whole system of surety-thip in Virginia.

His industry and ability found recog-

nition in appointment on some of the most important committees of the House At present he is chairman of the Committee on Militia and Police, and as such he presided during an investigation or dered by the House of the election of Brigadier-General of the Virginia Volun teers. Although much feeling was dis-played during the proceedings, all parties were satisfied with Mr. McRae's conduct of the investigation, and all of the mem-bers of the committee united in the report which was drawn by him. He is also member of the Committee on Courts of Justice, and his principal work has been done as an active member of this committee. All changes in the gene-ral laws touching the rights of persons ral laws touching the rights of persons and property are referred to this committee. He is also on the Committee on Privileges and Elections—the ranking committee of the House. His position on this committee would entitle him to its chairmanship in case of his return to the House. In addition to his regular committee work, Mr. McRae is on the special Committee on the Reduction of Criminal Expenses, whose work during the last session is saving the State about \$70,000 a year. the city of Norfolk, where he died last Monday afternoon.

The writer of this hastily-written tribute to his memory would now be conducting the funeral services had not imperative engagements detained him here.

For nearly half a century Dr. Southan was a conspicuous figure in Virginia, filling, as he did, so many positions of honor and usefulness.

In consequence of the utter failure of his health, accompanied by a depression of spirits which made the closing years of his life so full of all that was pathetic to those who loved him best, he passed from public observation into a passed from public observation into a

of his death will awaken a thousand remembrances and vividly recail the characteristics of the man and of the work he accomplished in so many departments of useful labor.

Dr. Southall was endowed with talents of a high order, cultivated and developed by judicious training. His facility in acquiring knowledge was as remarkable as was his original genius. After the completion of his university studies his interest seemed to be divided between general literature and political science. He was one of the most accomplished belies lettres scholars of his day. With a mind stored with whatever was purest and best in the noblest authors, with such models for his inspiration, he became the felictious writer whose style alone betrayed the authorship of whatever he composed, so that the classic Latin line translated and applied to Goldsmith by Dr. Johnson was true of him, that "he touched nothing which he did not adorn." His vigorous English, drawn from weils undeffied, was never tainted by the touch of degrading shang. In argument his arrangement was so logical, his positions were stated so perspicuously that each was like a weapon of precision, and so went straight and swift to the mark.

His political career as an editor commenced in Charlottesville, and cuiminated in Richmond in the conduct of the Enquirer and other journals with which he was connected. When be became one of the editors of the Central Presylerian, lit was to him a new departure when he entered on the field of religious journalism, but so admirably did he meet all the requirements of the position, that his ability was quickly recognized by the Church papers all over the country. Some of the most gracefully composed editorial that ever appeared in the Central Pressbyterian were from his pen.

Dr. Southall's scientific attainments were also attested by his masterly work on "The Recent Origin of Man, Illustrated from Geology and the Modern Science of Prehistoric Archaeology." In defending the Bible against the assaults of scientific infidelity he was emine
